E-TOOLS CABINET

Designed for all customers using multiple laptops and/or tablets, the Durabook E-Tools Cabinet stores, charges, and deploys up to 10 devices in a mobile or stationary solution. Each device is secured in its own lockable drawer for an added layer of security. The E-Tools Cabinet can be configured with a network switch and comes standard with RJ-45 and AC power connections to each drawer. For extended network connectivity, an optional WiFi package can be added to the cabinet.

Features

RJ45 AC

- **Casters** - Industrial grade all swivel casters (two are locking) provide 5" of height and ease of mobility.

- **Network Cover** - The Network Cover provides a secure compartment for a wireless router or access point and/or a network switch with CAT6 cables wired to each drawer.

- **Cable Management** - The cable management system prevents cable tress and fatigue.

- **Cooling System** - Fans are used to force cool air over the devices and dissipate heat.

- **Charging** - A 15A powerstrip provides AC power to each drawer. Electrical components are UL approved.

- **Security** - Devices are secured in individual drawers behind lock and key.
